

Spotted Butterflies

Pattern Matching

Spotted Butterflies
Pattern Matching

How to Play: Match each wing
with the matching wing.

Materials:

- File Folders (one per game - look for folders in different colors if desired).
- Sticky Velcro strips (to attach pieces to their places on the folder).
- White copy paper.
- Business-sized envelope or plastic bag (to attach to folder for piece storage).
- Access to a laminating machine or laminating sheets.

Assembly:

- Print the butterfly pages, and cut them out.
- Mount the butterflies into the folder.
- Cut out and attach the game title to the tab of the file folder.
- Cut out and attach game instructions to the back of the file folder.
- Attach the envelope or bag to the back of the folder.
- For durability, laminate the folder and all pieces. Also recommended is to purchase Velcro strips, and attach them to the game pieces in the folder, so that students can Velcro their answers in place. This allows the student to have more success and less frustration because of pieces moving around, and allows the teacher to have students "turn in" the folder game for the teacher to check later.
