

About Travis the Train Tracing Activities

(The tracing activities begin on the following page)

I've found that my students are much more on-task with schoolwork and activities when the activities are related to their interests. Almost all of my students with autism have loved trains, so I created a series of fine motor skill development tracing activities with a train theme.

The first pages in this document have the widest lines, and the following pages are more difficult with thinner lines. You can print all of the pages or just the pages you need.

It may also be helpful to laminate the pages and let the students use dry-erase markers to complete the tasks more than once.

I use the "Travis the Train" character for lots of activities with my students and they love him! You can view other stories and activities about a variety of themes featuring Travis the Train here: <http://positivelyautism.weebly.com/freebies.html>

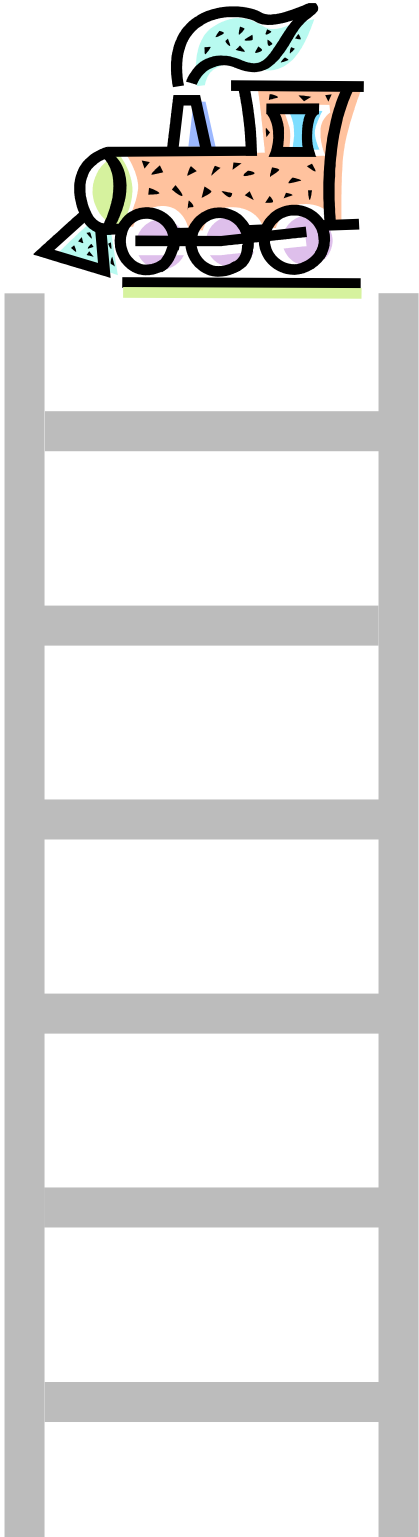

About Positively Autism
