

Valentine Train Sorting Activity

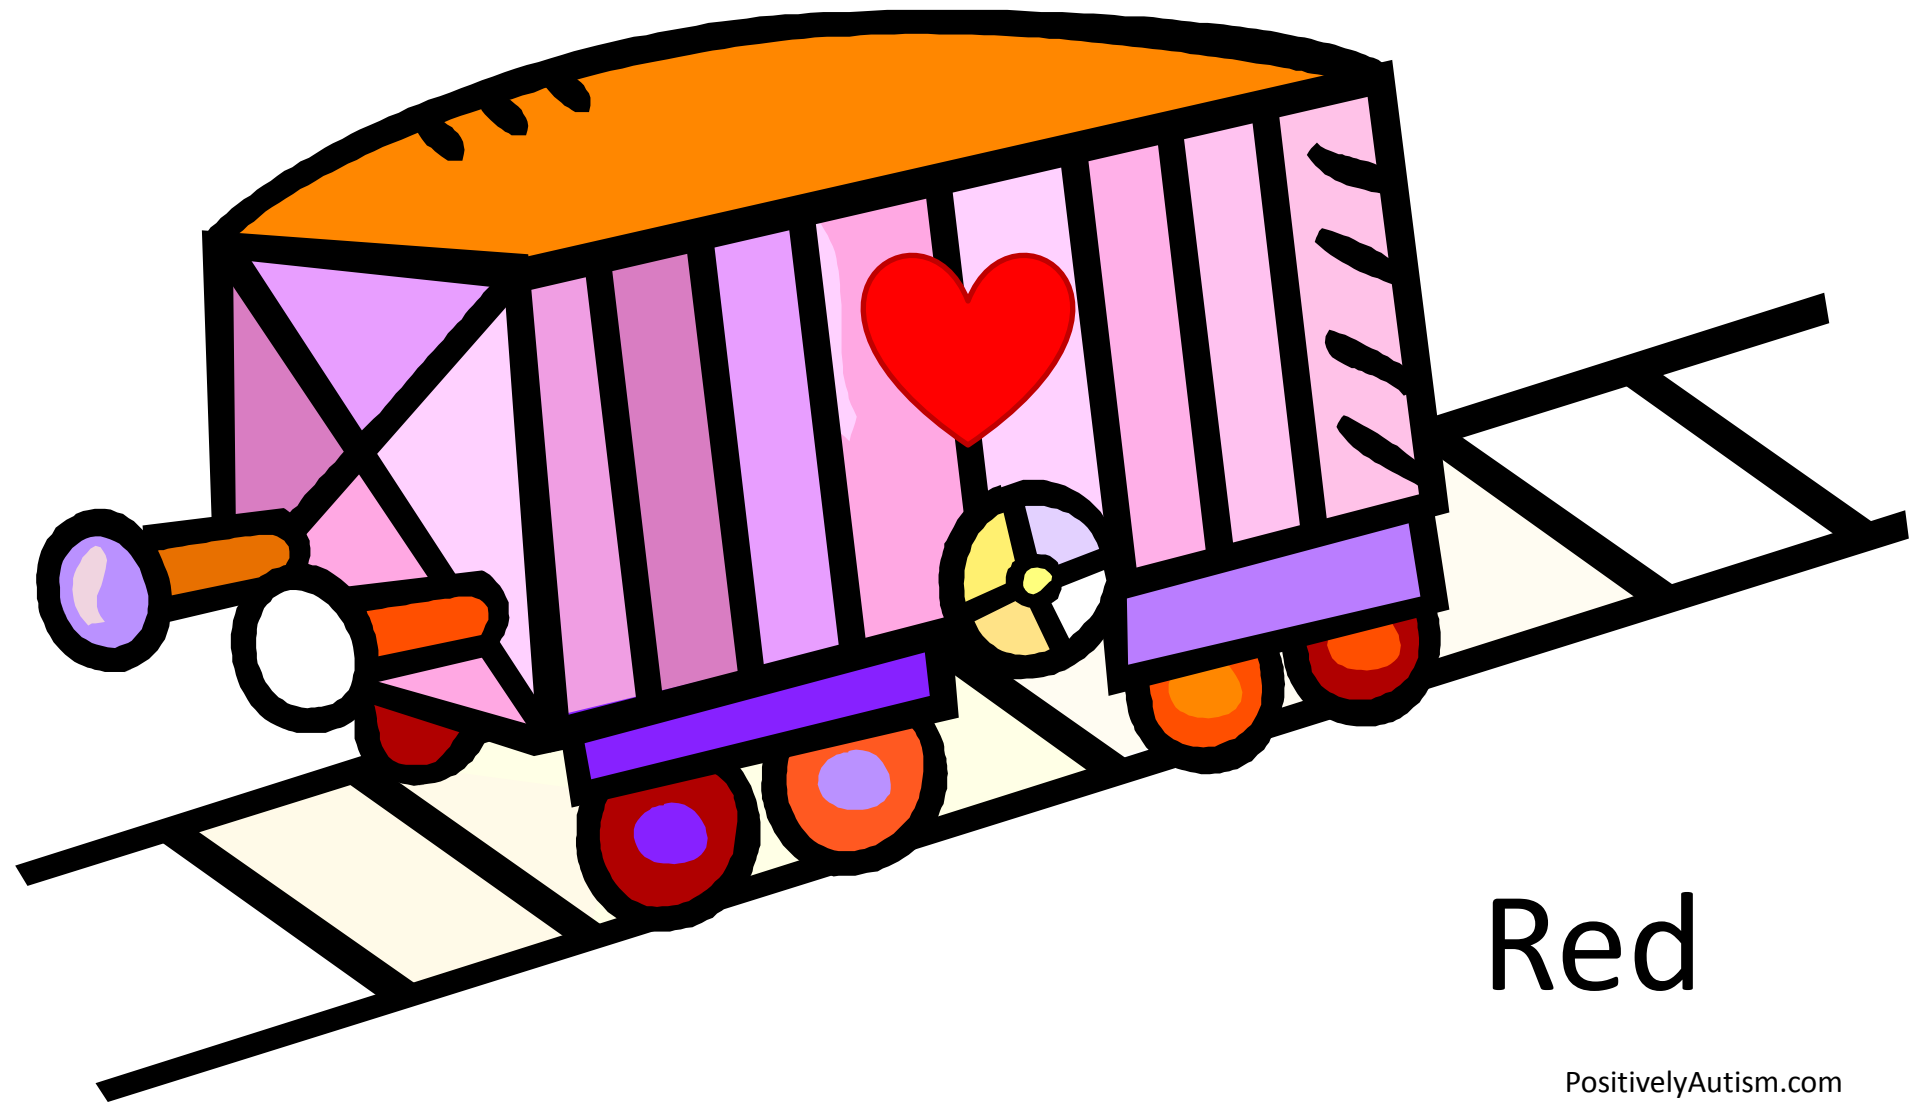

For more teaching resources, visit
<http://www.PositivelyAutism.com/>

Instructions

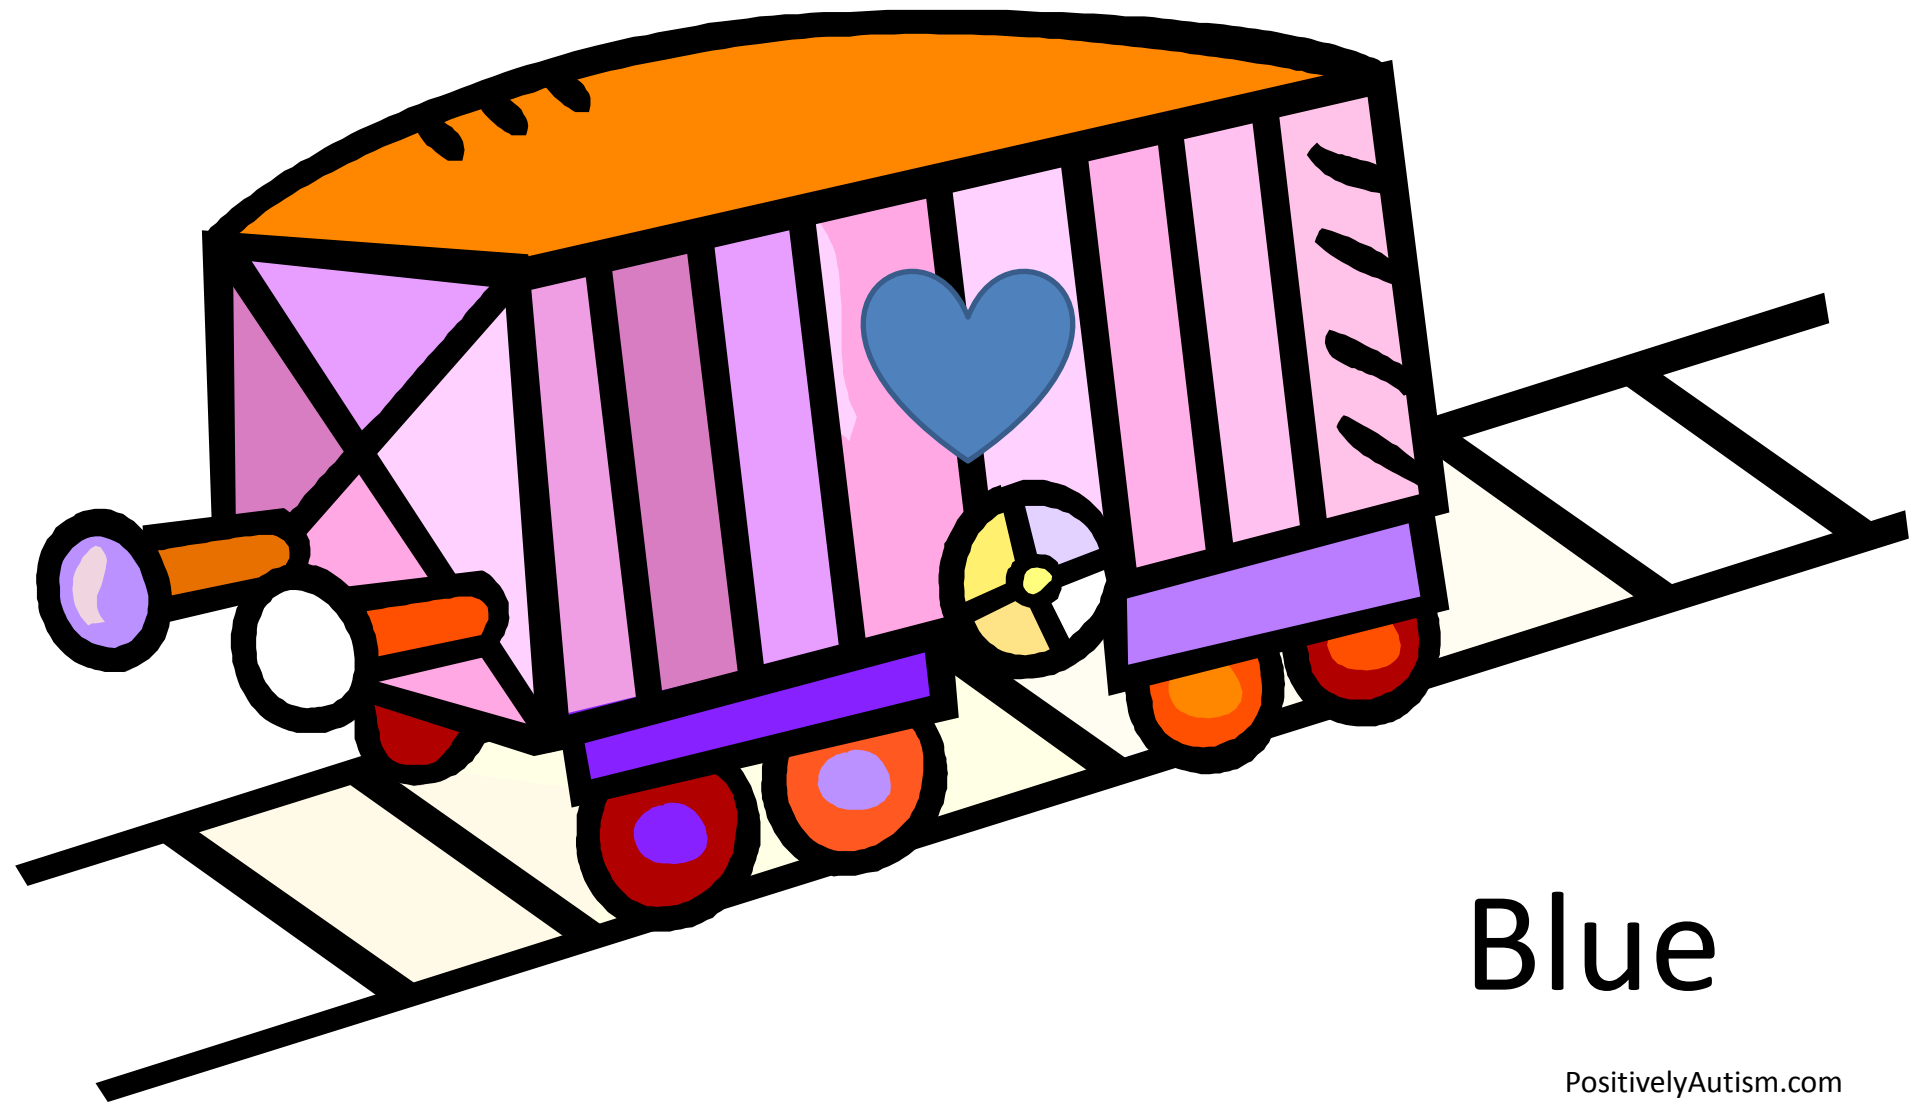

- Print the pages, attach Velcro dots at the top of the train car and the backs of the sorting pieces. The Velcro dot helps provide a visual cue for where the sorting objects should be placed. An example (with different sorting objects) is pictured below.
- This activity contains two sorting games. Sorting colors (red and blue) and sorting numbers and letters.
- Optional: you can use the train engine on the next page to put in front of the train car sorting sheets to make it look more like a train.

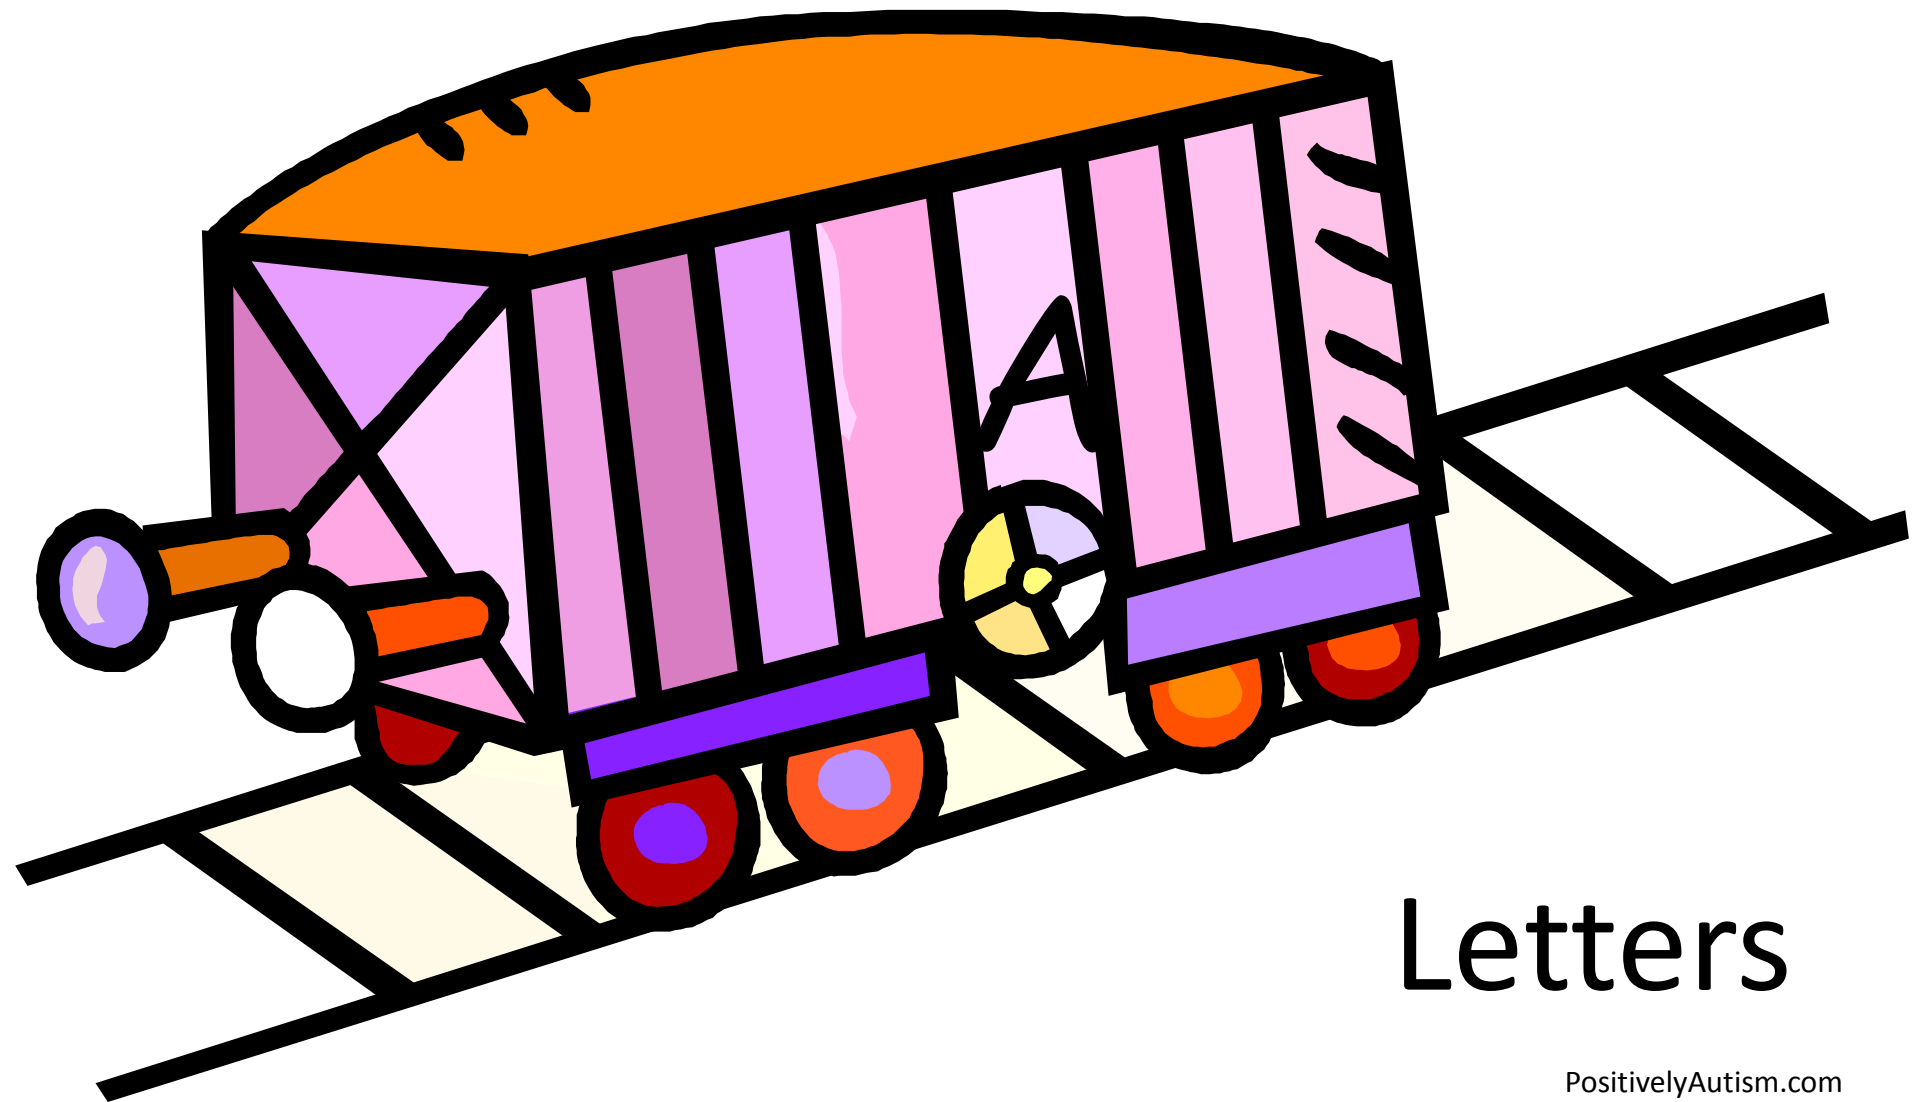

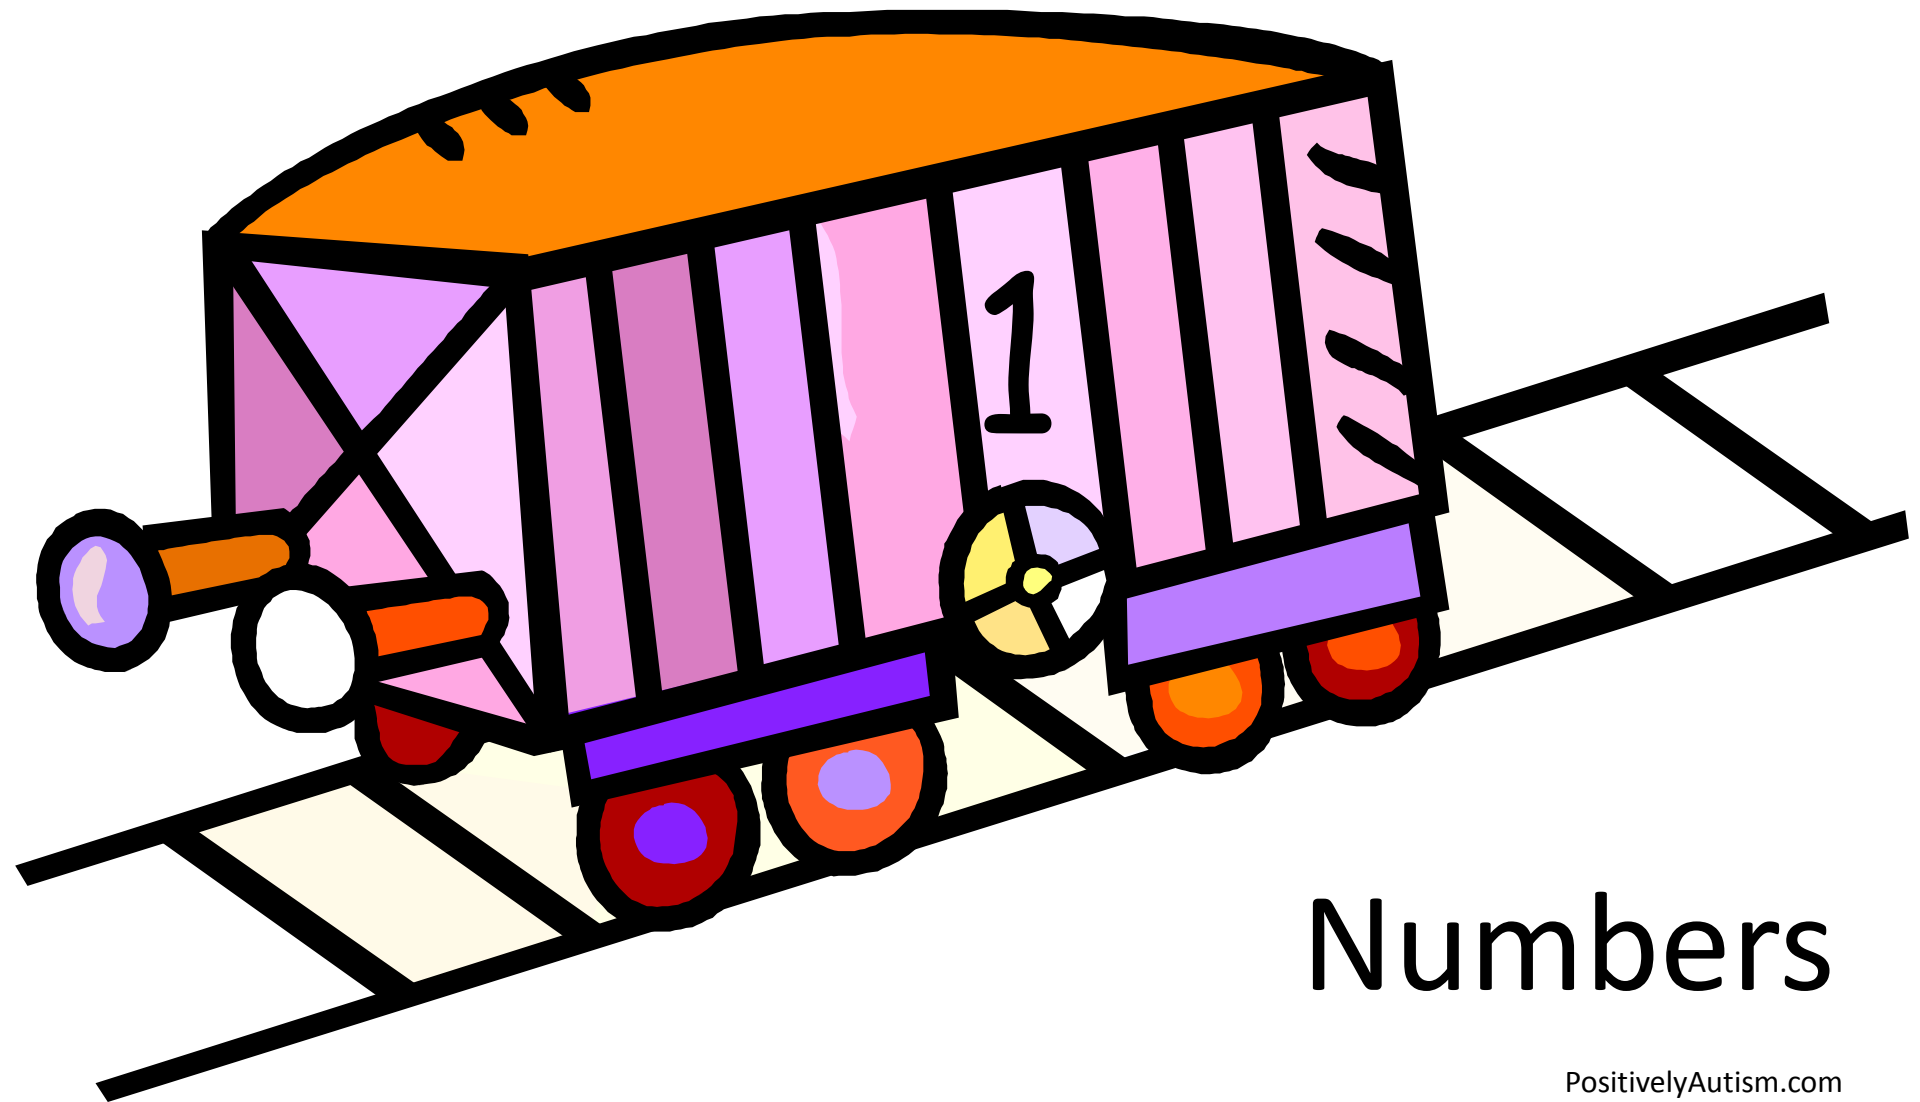

Red

Blue

Letters

Numbers
